This is a new and exciting after school program open to grade 3/4 students at Southwood Elementary School, lead by grade 11 and 12 students from SRSS.

Over our 4 sessions(every second Thursday), students will learn exciting scientific concepts through a variety of demonstrations, inquiry-based discussions, and hands-on labs where students create something to take home! All streams of science will be explored.

Materials will be provided. Cost is \$10/student. Limited space available.

Learn science while
sparking creativity
through innovative
and imaginative
learning!
